

Aidro is an Italian Company with a vast experience in the hydraulics sector and Additive Manufacturing

During 2006, Aidro received the Quality Certification ISO 9001 for the design and production of hydraulic valves and components and in 2018 the EN 9100

Starting from 2017, Aidro introduced the new technology Additive Manufacturing, enabling the production of Metal 3D Printed products in the hydraulics sector,

Aviation and Aerospace.

Driven by the desire to innovate and by the continuous growth of 3D printing, the company now led by the siblings Tommaso and Valeria Tirelli, has expanded its activity to other sectors such as oil and gas, aerospace and automation
